

IS4125

Compact Single-Line Laser Scan Engine

Honeywell's IS4125 is a compact single-line laser scan engine with an automatic trigger. Designed for easy integration into original equipment manufacturer (OEM) devices, the IS4125 delivers a set of versatile features and strong performance in a small form factor.

The IS4125 utilizes built-in object detection to trigger scanning, enabling presentation or hands-free operation for various applications. Scanning can also be triggered by the host for hand-held or other applications. The IS4125 comes with one of the widest sweep angles available, allowing wide bar codes to be scanned close to the face of the scanner. With the simple scan of a few programming codes, the IS4125 can be reconfigured in the field. Excellent light immunity allows the IS4125 to scan well, even under strong ambient light.

The IS4125 features integrated decoding for all standard 1D symbologies, including GS1 DataBar™. Its firmware is flash upgradeable, providing investment protection. A high-density version with a resolution of 5 mil is also available.

Mechanically, the IS4125 is enclosed to prevent contamination from the environment. Its modular design makes incorporation into a variety of mounting configurations virtually effortless.
