

# Vocollect Voice® on LXE® HX2

## Vocollect Voice: Choice, Performance and Flexibility for Your Mobile Workforce

Today's DC teams are more mobile than ever – a trend that has created tremendous opportunity, but also a few challenges. That's why Vocollect Voice is the performance choice for powering hands-free work for businesses with mobile employees – drawing from 20 years experience of working with thousands of client organizations worldwide.

Vocollect VoiceClient™ on the LXE HX2 is just one more example of Vocollect's open architecture capability across multiple manufacturers' platforms. Voice delivers maximum choice, flexibility and performance for your operators using voice systems, allowing you to now use a single device for multiple DC applications. This means you can minimize the number of devices your order selectors will need to be trained on while maximizing your technology investment in screen-based applications.

The VoiceClient software includes Vocollect's proven industrial voice recognizer, text-to-speech software, communications to the host system, communications to the VoiceConsole® management software and voice applications among many other industry-leading features.

With Vocollect Voice, you can create more value throughout your DCs and make your workforce more efficient with Vocollect VoiceClient – the performance choice for powering hands-free work for your mobile workforce.

*“Voice-directed DC solutions have empowered companies in new and exciting ways, and they achieve efficiencies that translate into true operational gains at all levels.”*

— Aaron Miller, Principal,  
Tompkins & Associates  
*“Considerations for Selecting the Right Voice Technology”*

## Increase Performance, Satisfaction

Vocollect VoiceClient on the LXE HX2 enables you to:

- Combine full-time, voice-only users and voice-enabled handheld users operating under one roof. They will use a single WMS connection; a single user and device management console; and the same standard applications – all the way down to voice prompts.
- Extend Vocollect Voice beyond intensive, full-time use to other applications where voice adds value. The same people who perform multiple operations can use screen displays for some applications, voice for others – choosing the right tool for the job at hand.
- Enhance productivity, accuracy and employee safety from receiving/loading to dock operations by voice-enabling your mobile device. Integrate with Vocollect Voice offerings, including design, installation, training, user management and support.

Voice-Directed Work®

## Why Vocollect Voice Is Your Best Choice for Mobile Applications

- /// **Fast, accurate and noise-tolerant.** Take advantage of 20 years experience of working with your colleagues to become the industry standard for Voice-Directed Work® in demanding industrial environments.
- /// **Add voice to mobile devices easily.** Your team can add highly accurate, personalized voice to fit their wearable devices in 30 minutes or less anywhere in the DC.
- /// **Runs standard Vocollect applications.** You can add standard, off-the-shelf voice-enabled applications for selection (piece and case picking), put-away, replenishment and inventory moves.
- /// **Flexible and scalable.** Text-to-speech capability, available in 16 languages, translates any data to voice. And if you need to add or edit voice dialogs, any text you enter is automatically converted to voice.
- /// **Industrial-grade voice recognition headsets.** The Vocollect SR-Series wired headset, with patented connector and speech groove, provides

the highest-quality voice recognition and consistent performance possible on LXE HX2 devices. The headset attaches easily to the LXE HX2 via a provided adapter.

- /// **Workforce communication.** Workers can respond in any language, choose to hear a male or female voice; and select from nine different speeds for their prompts (up to 400 words per minute).
- /// **Open and easy to support.** Microsoft® Windows CE™ mobile operating platform enables integration with common wearables supporting Vocollect Voice.
- /// **Total approach.** Tap into a vast team of experts to evaluate your operations, build a business case, design and implement on-time and on-budget, coordinate training, and provide 24/7 support to your DC team.
